

SYMBIO[®]
FRAMELESS

FRAMELESS WALLS

More glass, less aluminum. SYMBIO Frameless is designed to maximize natural light and visual connectivity. The system transforms the close interaction of how buildings, employees, and the elements are coordinated in one living relationship.

+ SYSTEM ATTRIBUTES

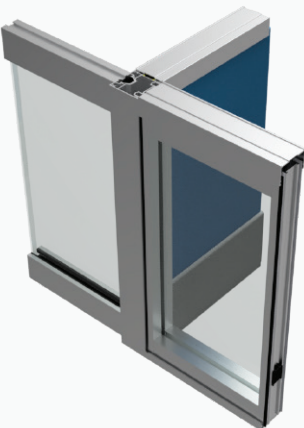

SYMBIO Frameless is a high performance center glazed system that focuses on maximizing the amount of exposed glass with minimal overall framework. Using a simple kit of parts assures a smooth installation with beautiful joints for an exquisite finish even your most discerning clients will love!

- There are 2 ½" x 1 5/8" aluminum framing components available.
- A two-piece lower track is available for efficient installation (with 1" overall tolerance).

- Top and bottom runners are available for an efficient layout.
- A center glazed pocket design is available for ½" glass (up to 40 STC).

- Maximum height for the walls is 10'.
- Engineered to work with multiple door types and the entire family of SYMBIO products.
